

E.W.E equipment

Dewa Precision Boring Heads

FEATURES:

High Quality, excellent performance, practical design at an affordable price.

Maximum rigidity is assured even when boring bar holder is used in an offset position.

Hardened and ground adjusting screw along with our wide base design guarantees long life and trouble free use.

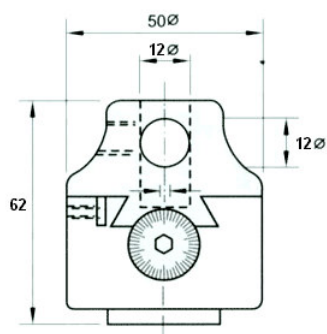

Ideal for CNC or manual machines.

These heads readily adapt to many different machines due to interchangeable shanks (*see overleaf for shank prices*).
